MEMORANDUM FOR: OC ADP Committee Members

SUBJECT : Computer Output Microform (COM)
Requirements

1. Attached is a memorandum on the task group being formed to determine requirements for upgrading COM facilities. Please advise me of your present and planned use of COM with emphasis on any requirements which are time-critical to the point that a breakdown of the single PSD recorder could have serious consequences.

2. We are scheduled to brief the task group on the requirement for COM output as a result of CDS on 29 May. Please have your responses to me by that date so that I will be in a position to answer queries which might arise.
